- Continuous reduce of unpleasant odours
- Reduction in the risk of bacterial contamination
- Restrain bacteria in any surfaces kept in contact with antimicrobial water
- No risk in relation to occupational health and safety of workers
- Assurance of bacterial free to any surface washed by antimicrobial water
- Long lasting residual disinfection
- Prevent Algae Growth

Specification

Model: S2E-018-2PC1

Flow rate: 32 L/m

Pipe Size: 3/4"

Voltage: 240 VAC

Input Voltage: 35 Volts Max.

Output Voltage: 25 Volts Max.

Dimension: H525 x W420 x D150 mm
