Re: Anti Bacterial Wash-down Unit (ABWU)

We write to recommend the use of the ABWU manufactured by CC Technologies.

We have had the units installed in our retail fish operations to treat all our water and even the water that make our ice form. Since installation of the ABWU we have saved on cleaning products and deodorises used in each shop.

There has also been a noticed decrease in the fish odour from each shop every day we receive compliments from customers commenting on how our shop does not smell like other fish shops.

Importantly we have noticed that the storage/shelf life of our products has also increased with the use of the unit because it seems to kill the germs that cause premature deterioration.

Yours sincerely

Albert Lau
